A101 Reading & Writing

Kinder – 1st Grade

Students learn to listen carefully to stories, poems, and informational texts in order to identify common words and phrases. Through books, conversations, and experimentations with language, students expand their vocabulary while building upon their fundamental understanding of English grammar. Students will use their expanded vocabulary to collaborate with one another through the sharing of inferences and ideas. They begin to write and use a combination of writing, drawing, singing and dictating to describe their experiences and to give information. Come enjoy early literary activities designed to foster fluency, comprehension, and finding joy through reading.
